

## Where does the money from Stormwater fee go?

### Services Provided by Stormwater Services:

- Floodplain information
- Repair or replace broken storm drainage pipes
- Inspect drainage or flooding problems on public and private property to determine if they are caused by stormwater runoff from a public street. City staff will identify if it is a public or private issue
- Clean open channels, catch basins, storm drains and culverts that are within the city right of way
- Decrease risks of flash flooding by planning, designing, constructing and maintaining public storm drain infrastructure
- Maintain roadways through street sweeping and solid waste services
- Enforce erosion and sediment control measures associated with construction activities
- Review new development for compliance with stormwater plans and standards
- Inspect and manage industrial discharges to protect against illegal discharges into storm drain systems
- Respond to hazardous spills and illegal dumping of chemicals into storm drains
- Repair sinkholes that occur above city drainage systems
- Education outreach

Cleaning storm drains

Street Sweeping

Installing storm pipe

Teaching water quality in classrooms

### Services **Not** Provided by Stormwater Services:

- Drainage problems caused by landscaping or yard grading
- Clean up sticks, leaves or debris left on private property after heavy rain or flooding
- Repair or replace private property that is damaged by stormwater runoff or flooding
- Runoff from adjacent properties
- Repair or replace privately owned storm drainage pipes
- Repair sinkholes that occur on private property
- Clear out incidental debris from creeks and drainage ditches such as trash, leaves, grass clippings or small tree branches

Working with communities to mark storm drains
